BARCELONA BREAST MEETING

Sharing experience and building knowledge

PROGRAM

BARCELONA
16TH - 18TH MARCH 2016
Hospital de la Santa Creu i Sant Pau
(Universitat Autònoma de Barcelona)

COMPlications in breast surgery
Welcome to Barcelona!
On behalf of the organising committee, we are very pleased to invite you to register at the new edition of the “Barcelona Breast Meeting – BBM” scheduled for 16th to 18th March 2016.

The last edition of the Barcelona Breast Meeting, chaired by Jaume Masiá, and Jian Farhadi, in March 2015, was a great success with attendance of over 300 people and enthusiastic feedback from all perspectives.

A world-renowned international faculty will meet in BBM 2016 to promote and share knowledge on latest breast surgery techniques. This three-day meeting will include oncological, aesthetic, functional and reconstructive aspects of breast surgery. Current techniques will be presented with a clear focus on optimizing outcomes, preventing and managing the most common problems in our practice. This conference will combine real-life experiences and professional insight into minimizing complications associated with the practical aspects of aesthetic and reconstructive breast procedures with tips and tricks from the experts to identify the root causes of complications and strategies to successfully manage them.

We will continue with the format of live surgery sessions, pre-recorded video surgery, discussion of difficult cases and round tables. New sessions, controversy and cross-fire debates will be introduced this year to increase interaction with the audience.

Having so many national and international brilliant minds and years of experience all together in one place has the potential to be an amazing opportunity to exchange ideas, seek advice and obtain pearls of wisdom from the “masters”, creating a platform for an open exchange.

Barcelona is a dynamic and exciting Mediterranean city and we are sure that you will enjoy your stay with us. There will be an interesting cultural and social programme besides the scientific events.
